

NEWSLETTER

Welcome the latest addition to our fleet!

Executive Pilots is excited to announce that beginning on February 16th you will have full access to a nice, new and low time Cirrus SR-22.

Many of you may already be familiar with the Cirrus, but for those of you who haven't had the chance to fly the Cirrus you'll enjoy the 310 HP from the Cont. IO-550-N. The 81 gallons of useable fuel offers a range of over 1,000 miles, and with a useful load

of about 1,200 pounds you should not have to leave anyone behind.

The interior is equally as comfortable and capable. The Avidyne MFD combined with dual Garmin 430's makes navigation a pleasure. Also on board complete XM satellite WX and radio, and a strong dual-axis auto-pilot ensure your flying is enjoyable as possible!

The icing on the cake is the hourly rate EPI has negotiated for the Cirrus! You won't find a better deal anywhere in the Southwest!

Let's Get You Checked Out

Checkout standards are still under review, but rest assured that you'll receive the most comprehensive checkout from one of our knowledgeable CFI's.

ADMIN NOTES:

1. Cirrus Checkouts will begin on Tuesday Feb. 16th, contact your CFI for details.

2. The owner of 8502N will be flying the Six back to SoCal for a few weeks for personal/business use on Feb. 22nd so adjust your schedule accordingly. It will be available in SoCal for use by request.

3. Monitor and keep your bookings in the scheduler as accurate as possible. Example if you only need the plane for an hour, try not to book it for 3 hours. This is the owner's request as they use bookings to forecast flying activity and revenue. Many thanks on doing this, it helps everyone out as the planes are flying more and more.
